Legal* Means for Transferring Data from Europe, UK, or Switzerland to the U.S.

*July 16, 2020: CJEU decision struck down EU-U.S. Privacy Shield.

*September 8, 2020: FDPIC of Switzerland issued an opinion that Swiss-U.S. Privacy Shield is not adequate.

EU legislators put restrictions on transfers of personal data outside of the EU, specifying that such data could only be exported if “adequate protection” is provided.

The U.S. not found adequate by the European or Swiss Commissions (who modelled its data transfer policy after the EU Privacy Shield) – no national comprehensive data privacy law – patchwork of self regulation, state, and federal laws.

U.S. companies can only receive personal data from the EU, UK, or Switzerland if they:
- Join the Privacy Shield Frameworks* or
- Provide appropriate safeguards (i.e. standard contractual clauses, binding corporate rules).

In 2020, the EU and Switzerland ruled the Privacy Shield Frameworks as inadequate* under its current structure due to concerns about potential U.S. government surveillance of EU and Swiss data.

• ANA continues to serve as a Privacy Shield dispute resolution provider as the U.S. government officials and EU & Swiss counterparts continue their ongoing negotiations to address concerns to ensure the continued flow of data and trade among our countries.
• The U.S. Department of Commerce and Federal Trade Commission continue to accept new applications, process renewals and enforce Privacy Shield.
